Woolz 1/2 - Origins (1980s)

FIP - Fast Interval
Processor

Metaphase finding,
cervical and lung
cancer screening, ...

Hardware → Software

Woolz 2/2 - Domains and Values

object ← { type
linkcount
domain
values
properties

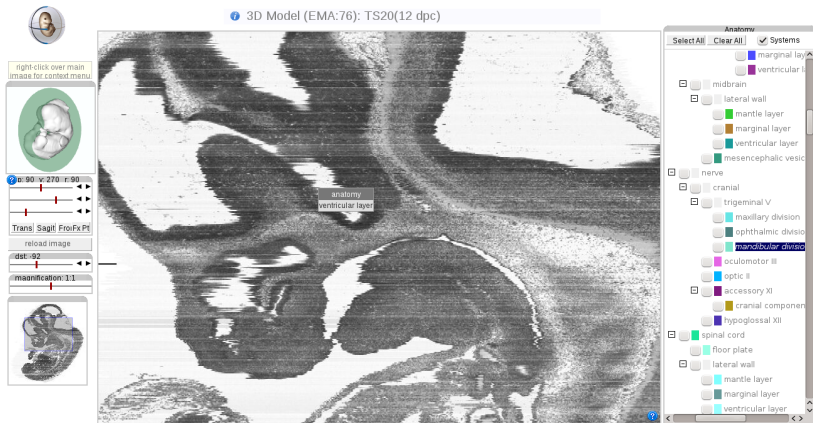

spatial domains,
conforming meshes,
...

(memory mapped)
values, mesh data,

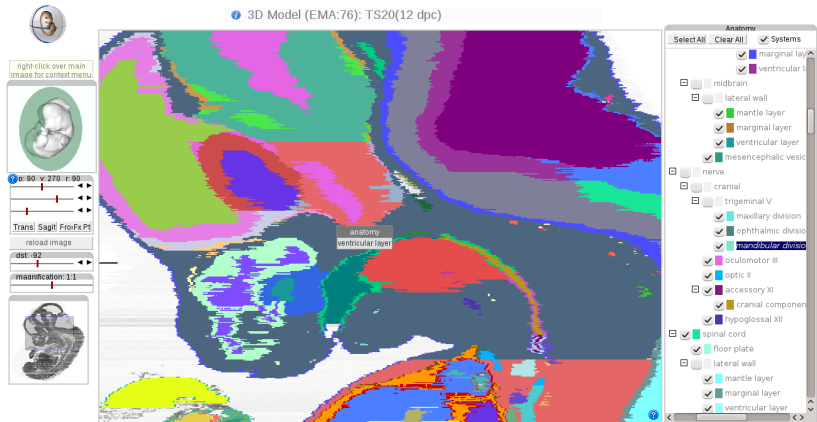

Object Types:

- ▶ Images
- ▶ Ancillary data (such as provenance)
- ▶ Annotation
- ▶ Boundaries, surface meshes and geometric models
- ▶ Conforming meshes
- ▶ Compound objects built from other objects
- ▶ Histograms and look up tables
- ▶ Transforms basis function, mesh, section

IIP3D 3/5 - The IIP3D Protocol

DST	- distance of the sectioning plane
FXP	- fixed point of the viewing section (1)
FXT	- fixed point of the viewing section (2)
MOD	- projection mode
PIT	- pitch angle of the section plane
ROL	- roll angle of the section plane
SCL	- scale used in sectioning
UPV	- up vector for the section plane
YAW	- yaw angle of the section plane

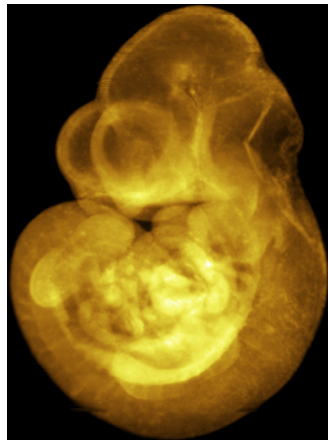

SEL	- component selection and morphological operations
MAP	- image value remapping
RMD	- rendering mode (section projection)

IIP3D 3/5 - The IIP3D Protocol

DST	- distance of the sectioning plane
FXP	- fixed point of the viewing section (1)
FXT	- fixed point of the viewing section (2)
MOD	- projection mode
PIT	- pitch angle of the section plane
ROL	- roll angle of the section plane
SCL	- scale used in sectioning
UPV	- up vector for the section plane
YAW	- yaw angle of the section plane

SEL	- component selection and morphological operations
MAP	- image value remapping
RMD	- rendering mode (section projection)

IIP3D 4/5 - Server & Client

Woolz objects with multiple channels composited on the server to tiles.

Memory mapped values for large size and number of objects.

Browser based IIP3D clients using HTML5.

Object queries.

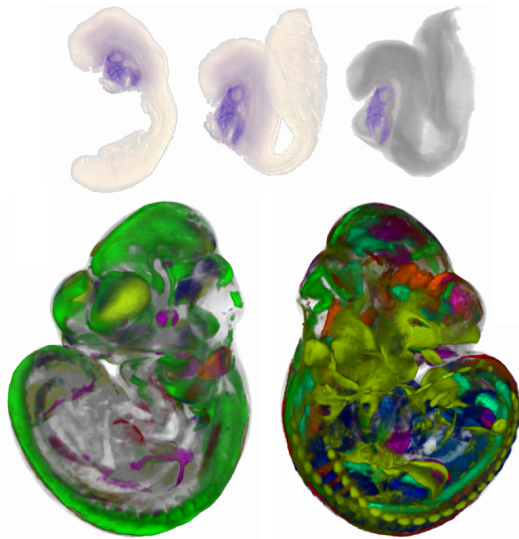

IIP3D 5/5 - Integration with OMERO

The screenshot displays the OMERO web interface. On the left, the 'Explore' sidebar shows a file tree under 'Jianguo RAO' with folders like 'IIPtest 1', 'threeDdata 2', 'Recon 5', and 'Orphaned images'. The central viewer window, titled 'Woolz IIP 3D viewer', shows a 3D visualization of a brain slice. Below the main image, there are controls for panning (p: 90, y: 0, x: 90), zooming (magnification: 1.1), and reloading the image. The right sidebar shows the 'General' tab for the image 'ts14vs111.tif'. It includes fields for 'IMAGE ID: 152', 'Launch full viewer', 'Launch wdzzip viewer', 'Add Description', and a table of metadata.

Metadata	
Owner:	Jianguo RAO
Acquisition Date:	2015-01-15 10:17:59
Imported Date:	2015-01-18 11:47:59
Dimensions (XY):	347 x 189
Pixel Type:	uint16
Pixel Size (XY) (µm):	1.0000 x 1.0000
Z-sections/Timepoints:	1 x 305
Channels:	0

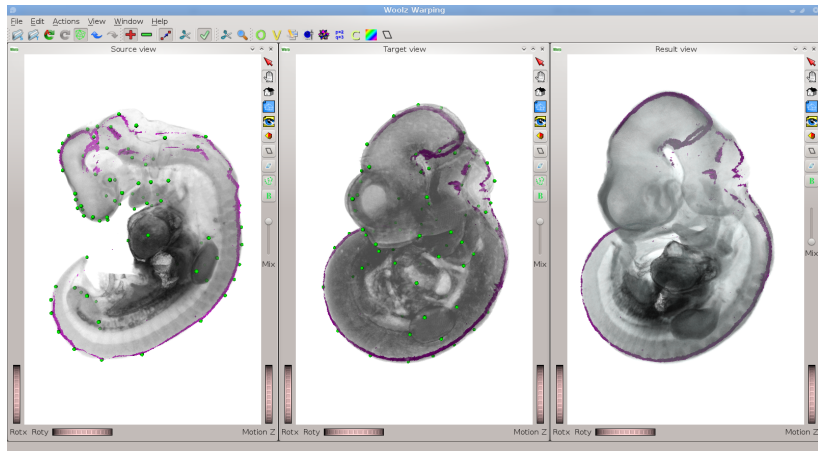

Transformations 1/2 - Examples

EMAGE

Transformations 1/2 - Examples

HUDSEN CS14 → EMAGE TS17

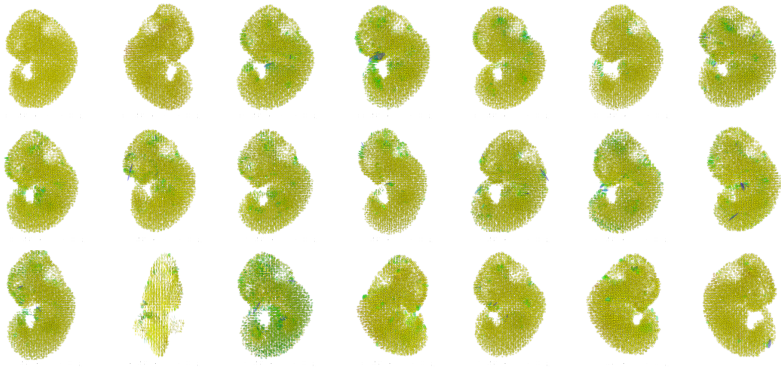

Transformations 2/2 - More Examples

CS14 \rightarrow TS17

Transformations 2/2 - More Examples

TS17 Population

Aspirations

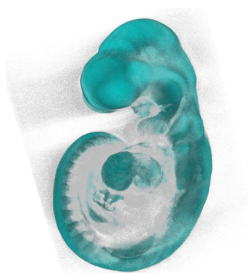

Extend use of OMERO

OMERO FS & Woolz objects
